Stone Type

When selecting a memorial it is important that climatic conditions are considered. Recently our province has suffered the effect of significant wind driven rain. Experts anticipate that in the coming decades this trend will increase.

Dereck Marshall & Sons use only the finest granites selected from sites throughout the world. Granite is an igneous rock, unequalled in its ability to withstand exposure to the elements.

Blue Pearl Granite

From Norway is becoming increasingly popular. Gold and silver lettering bring out the colour in this beautiful Arctic stone.

Black Granite

From Africa, India and the Far East usually has a polished finish and is embellished with gold or silver letters and ornamentation as selected.

Dark Grey Granite

From South Africa and the Far East, is normally polished and finished like Granite.

Balmoral Red Granite

From Finland, has a deep colour which is very attractive with either gold or silver lettering.

Tan Brown Granite

Memorial Sub-Base

Gold & Silver Lettering Examples
